

# Find your way with the EGNOS Portal

Get the inside information on Europe's satellite-based augmentation system at the official EGNOS Portal, the one-stop point of access, information resource and forum for developers and entrepreneurs who want to benefit from the enhanced precision and other features of the European Geostationary Navigation Overlay Service (EGNOS).

Want to create the latest ground breaking location-based application or software? Then dig into this rich online source for solutions.

Access peer forums, pose a question to the Help Desk and download marketing materials. Specific technical information, case studies and success stories are available for the aviation, road, agriculture, location-based services (LBS) and maritime segments of the market.
